Education

Program	Institution	Year
Doctor of Philosophy *Biostatistics* Advisor: Rajarshi Mukherjee	**Harvard T.H. Chan School of Public Health** *Boston, MA, USA*	September 2021-present
Masters of Statistics *Specialization: Theoretical Statistics*	**Indian Statistical Institute** *Kolkata, WB, India*	July 2019-May 2021
Bachelors of Statistics (Honours) *Major: Statistics*	**Indian Statistical Institute** *Kolkata, WB, India*	July 2016-May 2019

Research Interests

High Dimensional Inference • Random Matrix Theory • Causal Inference • Statistical Genetics

Current Projects

- **Asymptotic Inference in High Dimensional Instrumental Variable models** (in preparation)
  Madhav Sankaranarayanan, Rajarshi Mukherjee
  - Study the estimation of signal-to-noise ratio in practical high dimensional IV models, such as Mendelian randomization models
  - Prove optimality of exact instrument recovery under a range of dimensional specifications
  - Improve the estimation of causal quantities under particular practically relevant sparsity conditions
- **Asymptotic Inference for Constrained Regression** (Submitting to *Biometrika*)[IISA Student Poster Award]
  Madhav Sankaranarayanan, Rajarshi Mukherjee, Tamar Sofer, Yana Hrytsenko
  - Study the association of genetic determinants of proteins with glycemic traits
  - Improve the estimation of these associations using the estimated genetic correlation between proteins and traits
  - Construct provably optimal estimators and algorithms, and study polygenic risk scores for these traits
- **Minimax Detection of the Number of Spikes in Large Wigner Matrices** (in preparation)
  Madhav Sankaranarayanan, Rajarshi Mukherjee, Soumendu Sundar Mukherjee
  - Test presence of structure in spiked Wigner matrices
  - Deal with the bounded and unbounded dimensionality of spike sparsity and strength
  - Investigate asymptotic properties of various tests
- **Effects of Discontinuation Patterns of Anti-Seizure Medications**
  Madhav Sankaranarayanan, Maria Donahue, Shuo Sun, Julianne Brooks, Rebeka Bustamante Rocha, Joseph Newhouse, Sebastien Haneuse, Lidia Moura
  - Investigate the effect of initiation patterns of anti-seizure medications of adverse outcomes
  - Further look into related comorbidities in the Medicare dataset
  - Implement an emulated trial design to properly isolate the effect of discontinuity patterns

Presentations

Conferences

- **Asymptotic Inference in High Dimensional Instrumental Variable Models**
  Presentation at Joint Statistical Meetings 2025
- **Benzodiazepine Initiation Effect on Mortality Among Medicare Beneficiaries Post Acute Ischemic Stroke**
  Poster Presentation at American Academy of Neurology Annual Meeting 2025
- **Asymptotic Inference in Genetic Association Studies using Genetic Correlations of Glycemic Traits**
  Presentation at ENAR Spring Meeting 2025
- **Asymptotic Inference in Genetic Association Studies using Genetic Correlations of Glycemic Traits**
  Poster Presentation at International Indian Statistical Association Conference 2024
- **Optimal Detection of the Number of Spikes with Application to Genetic Association Testing**
  Presentation at Joint Statistical Meetings 2024
- **Asymptotic Inference in Genetic Association Studies using Genetic Correlations of Glycemic Traits**
  Presentation at WNAR/IMS Meeting 2024
- **A Distribution-free MIO approach to Hierarchical Modelling of Clustered and Longitudinal data**
  Presentation at New England Statistics Symposium 2024
- **Asymptotic Inference in Genetic Association Studies using Genetic Correlations of Glycemic Traits**
  Presentation at Joint Statistical Meetings 2023
- **Quantitative Analysis of Polygenic Risk Scores in the Genes for Good Cohort**
  Poster at Symposium on Big Data, Human Health and Statistics 2019

Seminars

- **Leveraging Instrumental Variables in High Dimensions**
  UW Causal Inference & Missing Data Reading Group, Oct 2025
- Keynote Speaker at StatStart 2024, July 2024
- **Mortality Analysis of Benzodiazepine Initiation**
  Harvard Biostatistics Student Seminar, Feb 2024
- **A Distribution-free MIO approach to Hierarchical Modelling of Clustered and Longitudinal Data**
  Harvard Biostatistics Student Seminar, Apr 2023

Work Experience

Academic Positions

Center for Value-Based Health Care and Sciences, Mass General Hospital — **Boston, MA, USA**
Research Assistant — *July 2023 - Present*
Co-advised by Sebastien Haneuse and Lidia Moura

University of Michigan School of Public Health — **Ann Arbor, MI, USA**
Summer Research Student — *June 2019 - July 2019*
Part of the Big Data Science Initiative

Institute of Mathematical Sciences — **Chennai, TN, India**
Visiting Researcher — *May 2018 - July 2018*
Advised by Gautam Menon

Additional Service

- Reviewer (Statistica Sinica)

Teaching and Mentoring Experience

- **Biostatistics Summer Preparatory Course** (August 2024)
  - Instructed classes in operational math (real analysis, linear algebra)
- **StatStart** (July 2023)
  - A one month summer intensive program intended for high school students from underrepresented backgrounds interested in data science and computing
  - Organized by the Department of Biostatistics, Harvard T.H. Chan School of Public Health
  - Instructed the Intro to Statistics and Probability classes
- **Summer Program in Biostatistics and Computational Biology** (June 2023 -July 2023)
  - A 6 week summer program, offering diverse undergraduate students a unique opportunity to learn about the use of quantitative methods for biological, environmental, and medical research alongside Harvard faculty, researchers, and graduate students.
  - Organized by the Department of Biostatistics, Harvard T.H. Chan School of Public Health
  - Mentored students as the Student Research Mentor for the research group advised by Rafael Irizarry
- **Qualifying Examination Preparation** (July 2023, July 2024)
  - Taught classes on probability (BIOSTAT 230) to Ph.D. students taking their qualifying exam
- **Teaching Assistant** (January 2023 - May 2023)
  - Statistical Inference 2 (BIOSTAT 241)
  - Instructed by Rajarshi Mukherjee
  - Received Certificate of Distinction in Teaching

Technical Skills

- Programming Language: R, Python, Julia
- Operating Systems: MacOS, Windows, Linux
- Tools: LaTeX, Microsoft Excel, Microsoft Office, Photoshop

Achievements

- Received a Student Poster Award at International Indian Statistical Association Conference (2024)
- Received a Student Research Award at the New England Statistical Symposium (2024)
- Received Certificate of Distinction in Teaching from the Department of Biostatistics at Harvard T.H. Chan School of Public Health (2023)
- Recipient of Robert Balentine Reed Prize for Excellence in Biostatistical Science (2022)
- Secured Distinction in the B.Stat (Hons.) program at Indian Statistical Institute, Kolkata (2019)
- Awarded the Kishore Vaigyanik Protsahan Yojana scholarship (2017)

Others

- Hobbies: Puzzles, Quizzing, Badminton, Table Tennis, Dancing, Chess, Origami
- Languages: English, Tamil, Hindi, Bengali (working knowledge), Konkani (working knowledge)
