# Madhav Sankaranarayanan

# Curriculum Vitae

Cambridge, MA, USA

📞 +1 (857) 867 2727 · 🜌 Email · 🗞 LinkedIn · 🗞 GitHub

# Education

Program	Institution	Year
Doctor of Philosophy	Harvard T.H. Chan School of Public Health	September 2021-present
Biostatistics	Boston, MA, USA	-
Advisor: Rajarshi Mukherjee		
Masters of Statistics	Indian Statistical Institute	July 2019-May 2021
Specialization: Theoretical Statistics	Kolkata, WB, India	
<b>Bachelors of Statistics (Honours)</b>	Indian Statistical Institute	July 2016-May 2019
Major: Statistics	Kolkata, WB, India	

# **Research Interests**

High Dimensional Inference • Random Matrix Theory • Causal Inference • Statistical Genetics

# **Current Projects**

- **Asymptotic Inference in High Dimensional Instrumental Variable models** (in preparation) *Madhav Sankaranarayanan*, Rajarshi Mukherjee
  - Study the estimation of signal-to-noise ratio in practical high dimensional IV models, such as Mendelian randomization models
  - Prove optimality of exact instrument recovery under a range of dimensional specifications
  - Improve the estimation of causal quantities under particular practically relevant sparsity conditions
- **Asymptotic Inference for Constrained Regression** (Submitting to *Biometrika*)[IISA Student Poster Award] *Madhav Sankaranarayanan*, Rajarshi Mukherjee, Tamar Sofer, Yana Hrytsenko
  - Study the association of genetic determinants of proteins with glycemic traits
  - Improve the estimation of these associations using the estimated genetic correlation between proteins and traits
  - Construct provably optimal estimators and algorithms, and study polygenic risk scores for these traits
- **Minimax Detection of the Number of Spikes in Large Wigner Matrices** (in preparation) *Madhav Sankaranarayanan*, Rajarshi Mukherjee, Soumendu Sundar Mukherjee
  - Test presence of structure in spiked Wigner matrices
  - Deal with the bounded and unbounded dimensionality of spike sparsity and strength
  - Investigate asymptotic properties of various tests
- Effects of Discontinuation Patterns of Anti-Seizure Medications

Madhav Sankaranarayanan, Maria Donahue, Shuo Sun, Julianne Brooks, Rebeka Bustamante Rocha, Joseph Newhouse, Sebastien Haneuse, Lidia Moura

- Investigate the effect of initiation patterns of anti-seizure medications of adverse outcomes
- Further look into related comorbidities in the Medicare dataset
- Implement an emulated trial design to properly isolate the effect of discontinuity patterns

#### **Publications**

# **Preprints**

- 1. **Sankaranarayanan, M.**, Hossain I., Chen, T. 2024. "A Distribution-Free Mixed-Integer Optimization Approach to Hierarchical Modelling of Clustered and Longitudinal Data." Preprint, arXiv (link)
- 2. **Sankaranarayanan, M.**, Rocha, R.B., Brooks, J.D., Donahue, M.A., Sun, S., Díaz, S.H., Tsai, A., Newhouse, J.P., Haneuse, S., & Moura, L.M.V.R. 2025. "Pain Treatment Strategy and Readmission Rates for Medicare Beneficiaries Post-Acute Ischemic Stroke." Preprint, medRxiv (link)

# **Presentations**

### Conferences

- o Asymptotic Inference in High Dimensional Instrumental Variable Models Presentation at Joint Statistical Meetings 2025
- o Benzodiazepine Initiation Effect on Mortality Among Medicare Beneficiaries Post Acute Ischemic Stroke Poster Presentation at American Academy of Neurology Annual Meeting 2025
- Asymptotic Inference in Genetic Association Studies using Genetic Correlations of Glycemic Traits Presentation at ENAR Spring Meeting 2025
- o Asymptotic Inference in Genetic Association Studies using Genetic Correlations of Glycemic Traits Poster Presentation at International Indian Statistical Association Conference 2024
- o Optimal Detection of the Number of Spikes with Application to Genetic Association Testing Presentation at Joint Statistical Meetings 2024
- o Asymptotic Inference in Genetic Association Studies using Genetic Correlations of Glycemic Traits Presentation at WNAR/IMS Meeting 2024
- o A Distribution-free MIO approach to Hierarchical Modelling of Clustered and Longitudinal data Presentation at New England Statistics Symposium 2024
- Asymptotic Inference in Genetic Association Studies using Genetic Correlations of Glycemic Traits Presentation at Joint Statistical Meetings 2023
- o Quantitative Analysis of Polygenic Risk Scores in the Genes for Good Cohort Poster at Symposium on Big Data, Human Health and Statistics 2019

#### **Seminars**

- Leveraging Instrumental Variables in High Dimensions UW Causal Inference & Missing Data Reading Group, Oct 2025
- Keynote Speaker at StatStart 2024, July 2024
- Mortality Analysis of Benzodiazepine Initiation Harvard Biostatistics Student Seminar, Feb 2024
- o A Distribution-free MIO approach to Hierarchical Modelling of Clustered and Longitudinal Data Harvard Biostatistics Student Seminar, Apr 2023

# **Work Experience**

Academic Positions

Center for Value-Based Health Care and Sciences, Mass General Hospital

Boston, MA, USA July 2023 - Present

Research Assistant

Co-advised by Sebastien Haneuse and Lidia Moura

## University of Michigan School of Public Health

Summer Research Student

Part of the Big Data Science Initiative

#### **Institute of Mathematical Sciences**

Visiting Researcher

Advised by Gautam Menon

June 2019 - July 2019

Ann Arbor, MI, USA

Chennai, TN, India

May 2018 - July 2018

# Additional Service.....

o Reviewer (Statistica Sinica)

# **Teaching and Mentoring Experience**

- Biostatistics Summer Preparatory Course (August 2024)
  - Instructed classes in operational math (real analysis, linear algebra)
- StatStart (July 2023)
  - A one month summer intensive program intended for high school students from underrepresented backgrounds interested in data science and computing
  - Organized by the Department of Biostatistics, Harvard T.H. Chan School of Public Health
  - Instructed the Intro to Statistics and Probability classes
- Summer Program in Biostatistics and Computational Biology (June 2023 July 2023)
  - A 6 week summer program, offering diverse undergraduate students a unique opportunity to learn about the use of quantitative methods for biological, environmental, and medical research alongside Harvard faculty, researchers, and graduate students.
  - Organized by the Department of Biostatistics, Harvard T.H. Chan School of Public Health
  - Mentored students as the Student Research Mentor for the research group advised by Rafael Irizarry
- Qualifying Examination Preparation (July 2023, July 2024)
  - Taught classes on probability (BIOSTAT 230) to Ph.D. students taking their qualifying exam
- **Teaching Assistant** (January 2023 May 2023)
  - Statistical Inference 2 (BIOSTAT 241)
  - Instructed by Rajarshi Mukherjee
  - Received Certificate of Distinction in Teaching

# Technical Skills

- o Programming Language: R, Python, Julia
- o Operating Systems: MacOS, Windows, Linux
- o Tools: LATEX, Microsoft Excel, Microsoft Office, Photoshop

# Achievements

- Received a Student Poster Award at International Indian Statistical Association Conference (2024)
- Received a Student Research Award at the New England Statistical Symposium (2024)
- Received Certificate of Distinction in Teaching from the Department of Biostatistics at Harvard T.H. Chan School of Public Health (2023)
- Recipient of Robert Balentine Reed Prize for Excellence in Biostatistical Science (2022)
- o Secured Distinction in the B.Stat (Hons.) program at Indian Statistical Institute, Kolkata (2019)
- o Awarded the Kishore Vaigyanik Protsahan Yojana scholarship (2017)

# **Others**

Hobbies: Puzzles, Quizzing, Badminton, Table Tennis,
Languages: English, Tamil, Hindi, Bengali (working knowledge), Konkani (working knowledge)
